Proposal: Minor Change to the Computer Science Graduate Course Offerings

1. Details

a. Change Requested

We request approval for the following minor change to the Computer Science graduate course offerings: eliminate 0701.560 Computing Environments in Education.

b. Sponsor

Leigh Weiss and members of the Computer Science Department Curriculum Committee.

2. Rationale

a. Need for the Change

This course has not been offered in over five years because there has been no demand for it. No future demand is anticipated and the course will not need to be offered in the future.

b. Curricular Effect

The course appears as an elective in the Master of Arts in Educational Technology program and will need to be removed from that program's list of electives.

3. Results of Consultation

We solicited letters of consultation from the College of Education and the Master of Arts in Educational Technology program. Received letters are attached.

From: "Dr. Louis Molinari" <molinari@rowan.edu>
To: "Stephen J. Hartley" <hartley@elvis.rowan.edu>

Dr. Hartley,

The course 0701.560 Computing Environments in Education is an elective in the Masters degree in Educational Technology, however it has not been used or requested by any of our students and I fully agree that it could be eliminated without any negative impact on our program.

As soon as this action is official I will strike it from our published list of electives.

Thank you for keeping me informed.

Sincerely,

Dr. Louis Molinari
Program Advisor Educational Technology Masters Degree
